

Current COVID-19 Precautions:

At the present time, we have implemented the following changes to help protect the safety of our patients and staff:

- We may be asking you some screening questions over the phone when we confirm your appointment, and again when you arrive at our office. If you have symptoms such as fever, chills, cough, body aches, or shortness of breath, we will need to reschedule your appointment for a later date.
- We are asking that you wear some type of face covering into your appointment.
- All of our doctors and staff will be wearing masks.
- The exam chair and all examination equipment will be thoroughly sterilized between every patient. We will also be sterilizing other frequently touched surfaces, such as countertops, multiple times daily.
- We will ask you to use hand sanitizer before handling frames or using office writing utensils. We will also be cleaning any frames you try on before placing them back on the frame display board.
- You will notice that our office no longer has toys, magazines, or other items that cannot be properly disinfected. We hope to see those return at some later date, but for now they will not be available.
- In order to help maintain social distancing between patients, we will be taking the following steps:
 1. We ask that no guests (other than caregivers) accompany patients into the office for their appointment.
 2. We will be making some adjustments to our available appointment times. This may mean you're offered more limited times for appointments.
 3. We will call you to schedule a specific time to pick up your glasses.
 4. We can ship contact lens orders directly to your home.
